

TOWN OF LOS GATOS

Multifunctional Printer Replacement, Management, and Maintenance

The Town received the following questions regarding the Request for Proposals (RFP) for Multifunctional Printer (MFP) Replacement, Management and Maintenance Services. The questions and answers are below:

Question 1:

I'm writing for clarification of this requirement in the RFP. It is listed under the section titled: **INFORMATION SYSTEMS / SETUP** Is this still needed? "Provide printer management and automatic deployment without the need for windows print servers, scripts, or Group Policy Objects (GPOs)"

Answer: This is not a requirement, but we are still interested in hearing proposed options.

Question 2:

What is the post process inserter used for and what sort of frequency is it used? Among your Konica devices, the largest/fastest model is the KM808, which has this feature.

Answer: The post process inserter is used for stapling/hole punching/folding and used for council packets and commission meetings (weekly) and budget printing (yearly) needs. Features are used often by various departments and would be desired for the brochures that are provided at the counter.
